

# **Physics 462**

**Geometrical and Physical Optics – 4 Credits**

Instructor – Dr. Mark Conde

<https://www.northropgrumman.com/wp-content/uploads/NASAs-JWST-primary-mirror-fully-deployed.jpg>

## Overview

### Description

This class will cover a broad range of topics in optics, including the nature and propagation of light; geometrical optics with mirrors, prisms, and lenses; polarization; superposition and interference; diffraction theory; nonlinear optics; Fourier optics; and coherent wave theory. These concepts will be covered in three one-hour lectures per week plus one three-hour laboratory session.

The course will follow the assigned textbook (Hecht) very closely. The emphasis in class will be on key concepts, rather than on complex mathematical derivations or proofs. Nevertheless, students will be expected to demonstrate mastery of the underlying mathematics in homework and exams.

Some topics will likely receive additional emphasis relative to that given by the textbook. These include compound thick lens systems, basic optical design, aberrations, and familiarity with common optical instruments. PHYS462 is not a General Education (GER) or Alaska Native Themed (ANT) course.

### Course goals and student learning outcomes

Upon completion of this course students will be familiar with:

- The basic physics of light propagation;
- Geometrical optics, and optical systems;
- Physical optics, including interference and diffraction;
- Optical instrumentation and capabilities;
- Principles of optical design;
- Practical laboratory techniques for optical testing and measurement.

My goal as an instructor is to provide every student with maximum possible opportunity for success. This means that I try to be as flexible as possible with the course requirements, to avoid creating needless hurdles. Nevertheless, some penalties for missed or late work are necessary; my policies in this regard are outline below.

### Instructor information

Instructor:	Dr. Mark Conde
Office locations:	Reichardt room 113 and Elvey room 706C.
Office Phone:	474-7741
Email:	<a href="mailto:mgconde@alaska.edu">mgconde@alaska.edu</a>
Office hours:	I do not intend to establish fixed office hours for this small class. I will always be available immediately after lectures, or at other times by arrangement. If you need to see me, speak to me after class or send me an email, to setup a time.

## **Approximate schedule**

Week	Dates	Class Topics	Lab Sessions
1	Jan 10 - Jan 14	Class introduction; Hecht. chapter 2	
2	Jan 17 - Jan 21	Hecht chapters 3,4	
3	Jan 24 - Jan 28	Hecht chapter 4	Lab 1
4	Jan 31 - Feb 04	Hecht chapter 5	Lab 2
5	Feb 07 - Feb 11	Hecht chapter 5	Lab 3
6	Feb 14 - Feb 18	Exam 1 (Wed). Hecht chapter 6	Lab 4
7	Feb 21 - Feb 25	Hecht chapter 6	Lab 5
8	Feb 28 - Mar 04	Hecht chapter 8	Lab 6
9	Mar 07 - Mar 11	Spring Break	
10	Mar 14 - Mar 18	Hecht chapter 8,7	Lab 7
11	Mar 21 - Mar 25	Hecht chapter 9	Lab 8
12	Mar 28 - Apr 01	Exam 2 (Wed). Hecht Chapter 9	Lab 9
13	Apr 04 - Apr 08	Hecht chapter 10	Lab 10
14	Apr 11 - Apr 15	Hecht chapter 10	Lab 11
15	Apr 18 - Apr 22	Hecht chapter 11,12	
16	Apr 25 - Apr 29	Finals week	
17	May 02 - May 06	Grades posted	

## **Course components and instructional methods**

### **Course materials**

Material for this course will be prepared electronically and will be available *over the web via the “Blackboard”<sup>1</sup> system at <https://classes.alaska.edu/>.* Material to be posted this way includes:

- Course syllabus (this document)
- Lecture notes (see comments below)
- Homework problem sets
- Lab notes
- Supplementary handouts
- Online student grades

Note that I will not be distributing homework or exam solutions to the web. These will instead be posted in the glass cabinets in the physics departmental area of the Reichardt building.

### **Lectures**

Lectures will **initially** be held via zoom, on Monday, Wednesday, and Friday from 11:45 AM to 12:45 PM. The zoom meeting link is:

<https://alaska.zoom.us/j/81464670779?pwd=VXVKVVJmWmdTWXQzQWNNMk1EVk1Tdz09>

This link will also be available from the Blackboard site for this class. Depending on how the covid-19 case load develops in Alaska, we **may** switch to face-to-face delivery after the end of January.

---

<sup>1</sup> All students should have access to Blackboard. Please let me know if you have difficulties with this.

The lectures will follow closely the material in the textbook. It is recommended that you read the chapters beforehand, and take notes during the lecture. The emphasis in the lectures will be on clarification of the key concepts in the book, rather than lengthy mathematical derivations.

I will be presenting lectures using a combination of computer and whiteboard. I intend to post electronic lecture notes online as well, provided this does not appear to be adversely affecting lecture attendance.

## **Homework**

Homework will be assigned each week during the Monday lecture and will be due by 5 pm on the following Monday. Homework must be submitted using Gradescope. I will discuss how to do this during our first lecture, and will also post the relevant link on the Blackboard site for this class. You are encouraged to work with others, but you are prohibited from simply copying other's work. Homework will count heavily toward your final grade, as well as provide me with feedback regarding your understanding of the material.

Problems assigned in this class can often be solved in several ways, with each solution involving a number of steps. So please be aware that even if you submit a correct solution to a problem, I may not recognize it as correct if it's poorly presented. While I will accept almost any work that you turn in, it is unlikely that I'll award many points for a homework or exam solution unless it:

- Is neatly laid out
- Is largely free from crossing out and over-writing
- Is accompanied by **descriptions in words of what you are doing at each step**

Indeed, this year I will introduce a formal **requirement** for each homework problem to be accompanied with verbal explanations of the major mathematical steps. This is a 400-level class, which means students should be preparing either to enter the professional workforce or to begin graduate school. Both of these environments require clear, coherent, and unambiguous communication – as will this class. The point of submitting homework solutions is not to tell me the final answer. (I already know that.) The point is to demonstrate that you can explain clearly and professionally *how that answer is obtained*.

A minimum cumulative grade of 50% for the homework is necessary to pass the class. All students should be capable of achieving this, given that I generally award a minimum of at least 25-30% for any genuine attempt at a problem. But please note – the remaining points for the problem will be weighted heavily according to my assessment of *how well you have explained the process of obtaining the solution*.

Solution sets will be posted in the glass cabinet in the Physics Dept. hall. You are strongly encouraged make copies to help you understand how to approach these problems; it will likely help on tests.

## **Laboratory work**

This class has an associated laboratory component, nominally consisting of one 3-hour lab period each week. The lab is currently scheduled for 8:30-11:30 on Thursdays.

**COVID-19 vaccination is required.** This course/lab section requires students to be fully vaccinated against COVID-19.<sup>2</sup>

Because of surging covid cases in January of 2022 and the timing of the vaccine requirement, we have been advised that no labs can be conducted during the first two weeks of the Spring 2022 semester. Therefore, **the first lab session will be during the third week of semester, on Thursday January 27.**

There will be eleven lab experiments. You must submit a written report for at least 10 labs. A passing grade in the labs is necessary to pass the course.

Note that I will be experimenting with the required format for Lab reports. I will not be requiring complete, traditionally formatted reports for every Lab. I will distribute a “worksheet” for each lab that specifies how it is to be written up. In some cases, I will ask for relatively traditional long-form lab reports, whereas in others I will just be looking for a simple summary of your findings. This is an attempt to reduce the time burden that Lab reports have created for students in previous years.

Reports or worksheets from a given lab will be due at the start of the lab session in the following week. Please understand that in grading the reports, I am not looking to see if you “got the right answer” from the measurements; that aspect of my grading carries negligible weight. The aspects of your lab work that I will be assessing are:

- Have you demonstrated that you understand the technique?
- Have you described the experiments clearly and completely enough that someone else could repeat the measurements and your subsequent analysis of results?
- Have you included sufficient error analysis to allow you to state with confidence the uncertainties associated with all your numerical results?
- Do you understand the results? Are they plausible? If not, have you identified possible reasons for this?
- Is the report clear, complete, and well presented?

A well-written lab report should be concise – but do not confuse “concise” with “sparse”. Your report must be complete, and must include sufficient detail to allow others to repeat your work, based solely on what you have written. If you receive a low grade for a report, I will allow you to revise it and resubmit it one week later to be re-graded, if you wish.

The optics lab is a small room. In 2021 I was advised by the UAF safety office that covid-19 restrictions meant that the maximum number of students we could have in this lab is two. This restriction currently does not apply in 2022 – but it could easily be re-imposed if the covid case load remains high. Should that happen, with four students currently enrolled, we would be unable to conduct the labs in-person. In the undesirable (but hopefully unlikely) case that this happens, I have already made a series of video snippets showing each step in the procedure for each lab in close-up detail. These videos provide all the quantitative raw measurements that are needed to address each experiment’s objectives. In lieu of doing the labs physically yourself, you would instead watch the videos, make notes of the procedures and measured data, and then write a lab report based on this.

---

<sup>2</sup> See: <https://sites.google.com/alaska.edu/coronavirus/uaf#h.hr3zulicwj8t>

Contact an authorized verifier from the list or see Rob in the Reichardt Building Dean’s office, room 358 by January 14, 2022 to verify your vaccination. Students with vaccine exemptions and those who do not wish to receive a vaccination should take advantage of the many fully online options available.

## **Exams**

There will be two one-hour exams during the semester and one two-hour final. The preliminary dates for these exams are

- Exam 1: Wednesday February 16, 11:45 am
- Exam 2: Wednesday March 30, 11:45 pm
- Final: 10:15 a.m. - 12:15 p.m., Friday, April 29

Complex formulae and physical constants will be provided for exam problems that require them. Exams will be conducted using Gradescope. I will upload the exam papers to Gradescope, and set it to make the papers available at the start of the scheduled exam time. Above, I have deliberately only listed the exam start times. This is because I will in each case set Gradescope so that it will accept your responses until 5 pm on the day of the exam. Of course, this gives you more than the usual amount of time to complete the exam. However, my main reason for the extended time period is to ensure that you have enough time to upload your responses, in case of technical issues. (Email me if you still have problems stopping you from submitting on time.)

## **Course policies**

### **Grading**

The course grade will consist of the following components

- Two one-hour midterm exams 20% (10% each exam)
- One two-hour final exam 15%
- Homework 35%
- Lab 30%

I will post all grades online, using the UAF's "Blackboard" system (<https://classes.alaska.edu>). All registered students have access to this system for checking their grades.

Final grades will be returned as letter grades with plus/minus modifiers. These will be derived from your overall percentage grade. The approximate conversions for each letter grade will be as follows. A:  $\geq 90\%$ ; B: 75% to 90%; C: 60% to 75%; D: 50% to 60%; F: <50%. Plus/minus modifiers will subdivide each main grade into three equally spaced sub-levels.

### **Attendance**

In-person laboratory work can only be performed if you are actually present in the labs. Thus, by Physics Department policy, attendance is an absolute requirement for in-person laboratory sessions. Should we not be able to conduct in-person labs, there would be no "attendance" requirement for any virtual labs. However, you must still watch the videos for virtual labs. Regardless of the delivery mode, you must submit reports for at least ten labs.

By contrast, you can make up for an occasional missed lecture by reading the textbook. Nevertheless, UAF policies<sup>3</sup> include statements that:

- “you must begin attending classes on the first day of instruction or you may lose your place, regardless of whether or not you have paid tuition and fees”
- “you are expected to adhere to the class attendance policies set by your instructors”

In general, I expect at least 90% attendance from all students. Extended periods of consistent absence may lead to a penalty in your overall grade, depending on circumstances.

## **Class participation**

There is no requirement for you to participate actively in class by asking questions or joining discussions, and there is no grade component based on this. Nevertheless, you are of course free to ask questions at any time during the lectures. Because we have a large amount of material to cover, I may defer answering lengthy or numerous questions until after class.

## **Missed or late work**

Two midterms and a final exam will be given in this course. In the case of documented illness, clash with another UAF commitment, or other emergency, a make-up exam may be given, at the discretion of the instructor. An unexcused absence for an exam will lead to 0 points earned on that exam.

Problem sets will generally not be accepted after the due date, without documented evidence of illness or genuine emergency. Students having documented clashes with other UAF commitments may pre-arrange alternate homework submission deadlines with me. All decisions regarding late homework or alternate deadlines will be at the discretion of the instructor.

## **Student conduct and academic honesty**

It is the responsibility for each student to be informed about the policies for student conduct and safety at the University of Alaska. You are encouraged to read these policies at <https://www.uaf.edu/student-affairs/student-resources/conduct.php#condu>. It should go without saying that students are expected to do their own original work for all assignments. Any deviation from this may be considered academic misconduct and may result in a failing grade and referral to university authorities for possible disciplinary action.

---

<sup>3</sup>See <http://catalog.uaf.edu/academics-regulations/attendance/> and <https://www.uaf.edu/register/services.php#attend>

## **Course requirements and materials**

### **Prerequisites**

Prerequisites:

1. Undergraduate - UAF level PHYS F213X Minimum Grade of C-
2. Undergraduate - UAF level PHYS F301 Minimum Grade of C-

or permission of instructor.

### **Required text**

*Optics*, 3<sup>rd</sup>, 4<sup>th</sup> or 5<sup>th</sup> editions, by Eugene Hecht. (Addison Wesley)

Note that I personally will be using the 4<sup>th</sup> edition of Hecht. It is ok to use the 3<sup>rd</sup> or 5<sup>th</sup> editions, but please let me know so I can check if there are any critical references to pages/chapter sections etc that are different.

There are no other supplementary texts assigned, although there are plenty of other good optics textbooks if you find you need additional explanations.

### **Technology Requirements**

Course materials will be delivered via Blackboard, which means students will require easy web-browser access to the internet. Most material will be delivered in PDF format, so that students will need access to Adobe Acrobat Reader or other third-party equivalent software.

Calculators will be permitted (and required) during exams. There will be no need for anything elaborate; an easy-to-use scientific calculator with trigonometric, exponential, and logarithmic functions is all that you will need. Remember that it is much more important to present the correct formulae and reasoning for solving a problem than it is to arrive at the correct numerical value. Please, explain your reasoning when presenting solutions to homework and exam problems. I will award partial points for correct reasoning, if presented, even if the final answer is incorrect or incomplete.

In general, it is better to work with algebraic variables whenever possible; numerical values should not be substituted in until absolutely necessary.

## **Other issues**

### **Complaints and concerns**

You are always welcome to discuss your concerns with me. However, if you have a concern that you feel cannot be resolved by discussion with me, you may wish to contact the Physics Department chair, Dr. Truffer. If your concern cannot be resolved at the department level,

you may also discuss the matter with the Dean of the College of Natural Science and Mathematics.

## **Student Health and Counseling Center**

The University provides health and counseling services through its Student Health and Counseling Center, which is located at 612 N. Chandalar Drive, on the 2nd floor of the Whitaker Building (the same building as Fire and Police, across from the bus turn around.) Their web site is at <http://www.uaf.edu/chcl/>. The center will see students on an appointment basis. The number to call for an appointment is 474-7043. It is best to do so at 8:00 AM in the morning, because they are scheduled daily on a first come first serve basis.

## **Disabled students**

Disability services are provided free of charge, and are available to any student who qualifies as a person with a disability. Student seeking special accommodations for a disability must first discuss their needs with Disability Services. Call 474-5655 to schedule an appointment.

UAF Disability Services is located in the Whitaker Building, room 208. Extensive support is available, as described at <http://www.uaf.edu/disability/>

As needed, I am happy to work with you, disability services, veterans' services, rural student services, etc. to find reasonable accommodations for all students' needs.

## **COVID-19 Statement**

COVID-19 statement: Students should keep up-to-date on the University of Alaska policies, practices, and mandates related to COVID-19 by regularly checking this website:

<https://sites.google.com/alaska.edu/coronavirus/uaf/uaf-students?authuser=0>

Further, students are expected to adhere to the university's policies, practices, and mandates and are subject to disciplinary actions if they do not comply.

## **Other UAF Student Support Resources**

- Speaking Center (907-474-5470, speak@uaf.edu, Gruening 507).
- Writing Center (907-474-5314, uaf-writing-center@alaska.edu, Gruening 8th floor).
- UAF Math Services, uafmathstatlab@gmail.com, Chapman 305 (for math fee paying students only).
- Developmental Math Lab, Gruening 406.
- The Debbie Moses Learning Center at CTC (907-455-2860, 604 Barnette St, Room 120).

For more information and resources, please see the Academic Advising Resource List:

[https://www.uaf.edu/advising/lr/SKM\\_364e19011717281.pdf](https://www.uaf.edu/advising/lr/SKM_364e19011717281.pdf)

## **Emergency notification plan**

Students will receive emergency notifications via phone or email. Please check your UAOnline account to confirm your emergency notification settings. For more information,

please refer to the Student Handbook. In cases where you do not have access to your devices, as your instructor, I will take responsibility to relay any emergency notifications.

**Extended absence policy:**

The university of Alaska Fairbanks recognizes that students may need to miss more classes than allowed by a particular instructor as specified in course policies. Extended absences are defined as missed classes or course work by students beyond what is permissible by the instructor's written course policies. Students may need to miss class and/or course work for a variety of reasons, including, but not limited to:

- Bereavement
- Personal illness or injury
- Serious illness of a friend, family member or loved one
- Military obligations
- Jury service
- Other emergency or obligatory situations

For more information, go to the Students Handbook or the Center for Students Rights and Responsibilities

## **REQUIRED INFORMATION FOR UNDERGRADUATE SYLLABI**

### **STUDENT PROTECTIONS AND SERVICES STATEMENT:**

Every qualified student is welcome in my classroom. As needed, I am happy to work with you, disability services, veterans' services, rural student services, etc. to find reasonable accommodations.

UAF embraces and grows a culture of respect, diversity, inclusion, and caring. Students at this university are protected against sexual harassment and discrimination (Title IX). Faculty members are designated as responsible employees which means they are required to report sexual misconduct. Graduate teaching assistants do not share the same reporting obligations. For more information on your rights as a student and the resources available to you to resolve problems, please go to the following site: <https://catalog.uaf.edu/academics-regulations/students-rights-responsibilities/>.

As required, if I notice or am informed of certain types of misconduct, then I am required to report it to the appropriate authorities.

UA is an AA/EQ employer and educational institution and prohibits illegal discrimination against any individual: <https://alaska.edu/nondiscrimination/>.

### **INCOMPLETE GRADE POLICY:**

Your instructor follows the University of Alaska Fairbanks Incomplete Grade Policy: "The letter "I" (Incomplete) is a temporary grade used to indicate that the student has satisfactorily completed (C or better) the majority of work in a course but for personal reasons beyond the student's control, such as sickness, has not been able to complete the course during the regular semester. Negligence or indifference are not acceptable reasons for an "I" grade."

### **EFFECTIVE COMMUNICATION:**

Students who have difficulties with oral presentations and/or writing are strongly encouraged to get help from the UAF Department of Communication's Speaking Center (907-474-5470, speak@uaf.edu) and the UAF English's Department's Writing Center (907-474-5314, Gruening 8th floor), and/or CTC's Learning Center (604 Barnette Street, 907-455-2860).

### **COVID-19 STATEMENT:**

Students should keep up-to-date on the university's policies, practices, and mandates related to COVID-19 by regularly checking this website:

<https://sites.google.com/alaska.edu/coronavirus/uaf/uaf-students?authuser=0>

Further, students are expected to adhere to the university's policies, practices, and mandates and are subject to disciplinary actions if they do not comply.

#### ADDITIONAL INFORMATION

The University of Alaska has detailed and ever-changing requirements for courses and course syllabi. The purpose of this statement is to indicate that, in addition to requirements explicitly stated here, all other current overarching UAF policies also apply to this course – whatever the heck they may be this time around....
