

Adobe Acrobat Pro can only be installed on **University-owned Windows 10 computers**. This guide will walk you through two methods of installing the software.

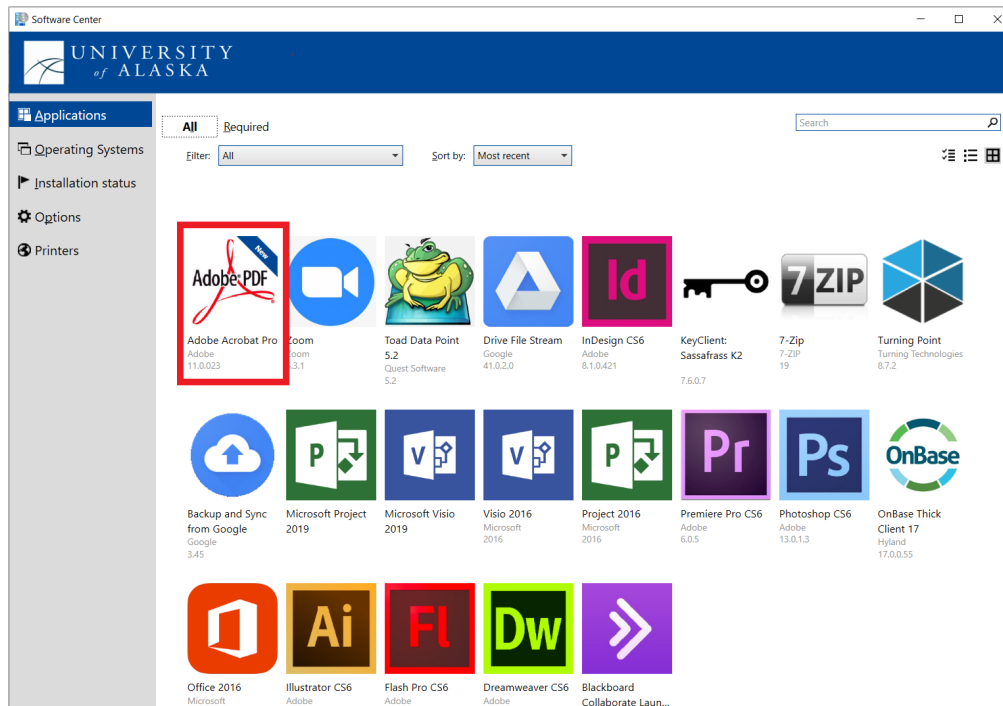

## Install With Software Center (Recommended)

1. Locate and open the **Software Center** program on your computer.

Software Center  
App

2. Find the **Adobe Acrobat Pro** icon and left click it.

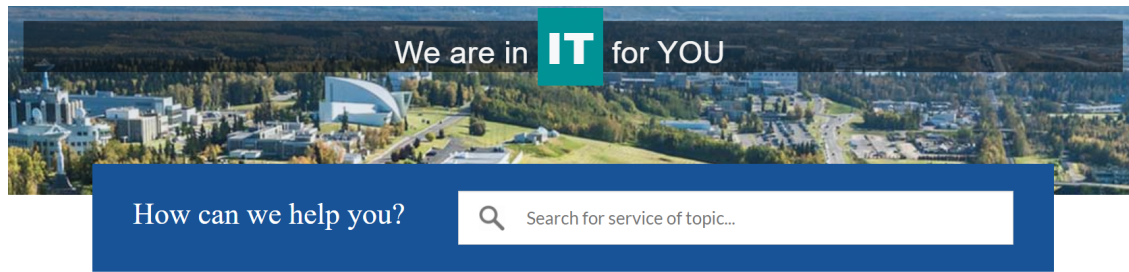

3. Close out all internet browsers, including Google Chrome, Mozilla Firefox and Internet Explorer. If any of these applications are open, it will cause errors with the installation.
4. Click the **Install** button.

## Manual Installation With Software Catalog

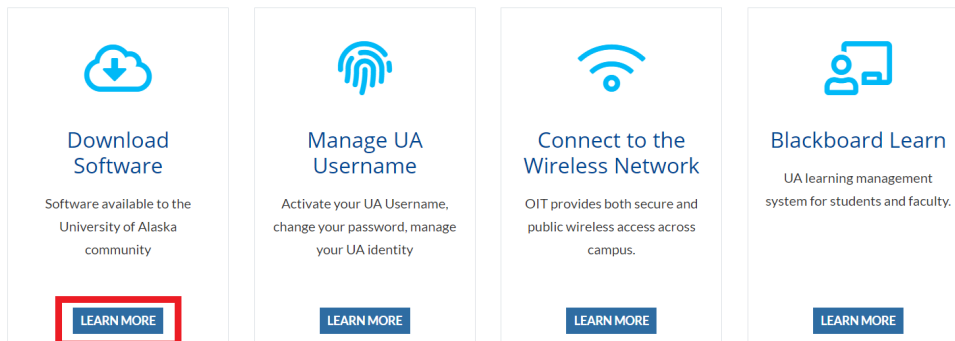

If you are unable to find Software Center on your University-owned computer, then it may not have been setup by OIT and will lack that option. In that case we recommend downloading and installing Adobe Acrobat Pro from our website.

1. Open your preferred internet browser and navigate to [alaska.edu/oit](http://alaska.edu/oit)
2. Click the **Download Software** button.

### Popular Services

Below are links to some of our most popular [services](#).

3. Scroll down and click the **Manual Installation** button, then click the **Software Catalog** button.  
**Desktop/Laptop not enrolled in UA Domain**

4. Login with your **UA Username** and **Password**.  
**Note:** If you are unable to login to this page, please contact the OIT Service Desk for assistance.
5. Click the **Acrobat Professions** link under the **Windows Software** section.
6. Follow the download and installation instructions from that page.
