

Articulation Agreement

2017-2018

University Alaska Fairbanks

Interior Alaska Campus

4280 Geist Road

Fairbanks, Alaska 99709

Alaska Gateway School District

PO Box 226

Tok, Alaska 99780

Purpose:

In addition to the current Tech Prep Agreement between University of Alaska Fairbanks and Alaska Gateway School District, we have agreed to add the following course that is within CRCD Tribal Management (TM) programs.

1. Alaska Gateway School District will follow a UAF TM curriculum in coordination with the administration and faculty of the University of Alaska Fairbanks pertaining to the following courses on the course below.
2. Alaska Gateway School District will teach for the attached outcomes.
3. The attached syllabus will follow the learning outcomes of the university-approved course listed.

UAF Course Number	UAF Course Title	Number of UAF Credits	Alaska Gateway School District Course Title
TM 250	Current Topics in Tribal Management: Alaska Vet Tech, One Health	3 credits	Alaska Vet Tech

1. The attached syllabus will be followed.
2. Alaska Gateway School District will provide necessary support for students to be successful in this course which may include computer support, reference books and academic assistance.
3. Interior Alaska Campus will process the registrations.
4. In order to receive concurrent credit, the student will register for the Tech Prep class during the semester in which the competencies will be completed.

PERSONAL ATTRIBUTES

Energetic and educated professional with 20 years teaching experience in elementary, special education, and secondary English. I am a life-long learner who transfers excitement to her students. In addition, as former owner of a restaurant and former manager of a premium finance company, I relay real-life experiences to my classroom. Excellent social and communication skills help foster a comfortable environment for learning. As a creative and organized person, I effectively interplay various activities to benefit multiple learning styles. I believe in cooperative learning and phasing myself into the role of facilitator. Those who teach, learn. I have a

solid background and firm understanding of the process required to develop program objectives and map course curriculum to achieve desired student outcomes. I have taught in both intercity, urban, and rural schools, and currently teach in an Athabascan Alaska Native village.

Course Information

Course Name	Alaska Veterinary Technology
Course Number	*TBD with UAF
Course Instructor	Peggy Bruno
Course Credits	Each semester will equal 3 college credits, 6 credits for a full year
Location	Course is online at www.wikispaces.com (individual student logins required for access). Students will meet daily at an appointed time in their school classrooms with a monitoring teacher to access and work on course materials.
Dates/Times	5 hours per week, 18 weeks per semester, 90 hours per semester
Instructor Contact Info/Hours	Students may email: pembrokenotes@gmail.com or pbruno@agsd.us at any time. Instructor responds promptly, always within 24 hours. Instructor available for scheduled meetings via Google Hangouts. Email to schedule.
Course Description (Limit 100 words)	Alaska Veterinary Technology is a portal to one of the most rewarding and enriching fields of study. Veterinary medicine is composed of compassionate professionals, technically skilled and work as a team. As in human medicine, the veterinary health-care team is composed of many members, each with an important role in the proper care of patients and function of a veterinary hospital. This course is divided into 18 weekly units encompassing science, medical terminology, animal behavior and handling, office procedures, and so much more. This course is an overview of what knowledge is needed to become a veterinary assistant.
Course Objectives	<p>Students will:</p> <ul style="list-style-type: none"> ● Describe the different roles of veterinarians, veterinary health technicians, and other specialists. ● Understand the human–animal bond and the role the veterinarian plays in this bond. ● Understand the different types of facilities used in veterinary medicine and the types of care provided at these different facilities. ● Understand the educational requirements for veterinarians, including beneficial high school and college courses. ● Identify some of the challenges and benefits of being a veterinarian. ● Learn about the veterinary technician’s role in veterinary medicine. ● Students will understand procedures in handling and restraint

	<p>for the safety of of healthcare members, clients, and patients</p> <ul style="list-style-type: none"> • Students will recognize behaviors in dogs and cats and how to handle them in the hospital.
Student Learning Outcomes	<p>*Students will be able to:</p> <ol style="list-style-type: none"> 1. Communicate in a professional manner in all formats- written, non-verbal, and electronic. 2. Participate in facility management utilizing traditional and electronic media and appropriate veterinary medical terminology and abbreviations. 3. Follow and uphold applicable laws and the veterinary technology profession's ethical codes to provide high quality care to patients.
Instructional Methods	Daily assignments, projects, field trips, discussion boards, blogging. In class work activity and field trips facilitated and chaperoned by school site course monitor.
Course Pre-Requisites	Students must be in high school

Course Outline

Course Calendar	<p>Week 1: Introduction to the Class Week 2: Introduction to the Veterinary Profession Week 3: Animal Behavior Week 4: Animal Handling and Restraint Week 5: Anatomy/Feline Week 6: Anatomy/Canine Week 7: Breeds/Feline Weeks 8-12: Breeds/Canine Week 13: History, Taking Exams/Procedures Weeks 14-16: Nutrition Weeks 17, 18: Immunology Week 19: Radiology Weeks 20, 21: Surgical Assisting Week 22: Medical Terminology Week 23: Avians Week 24: Reptiles Week 25: Equines Week 26: Bovine Week 27: Porcine Week 28: Reindeer Week 29: Exotic Breeds Week 30: Inventory Week 31: Receptionist Skills Week 32: Kennel Assistant Skills Week 33: Veterinary Assistant Skills</p>
------------------------	--

	<p>Week 34: Veterinary Technician Skills Week 35: OSHA Week 36: Course Wrap-Up</p>
Course Instructional Resources	<ul style="list-style-type: none"> • Access to online Wikispaces classroom for the class • Access to Gmail, Google Drive, Google Docs, Google Sheets, Google Drawing, Google Slides • Local area mushers and veterinarians (coordinated through program liaisons)
Course Policies	<ul style="list-style-type: none"> • Complete work by the due dates, if late submission is anticipated, contact the course monitor and course instructor • Participation in online discussion boards and blogs required • Viewing and commenting on course instructional videos required • All discussion, commenting and writing for the course must be school-appropriate • Participation in field trips and labs required, barring personal emergencies or special pre-arranged circumstances
Course Assessment Plan	<p>All assigned activities in the class are assessed (daily assignments, projects) Participation in field and lab activities is assessed</p>
Assessment Points	<p>Not all activities will be worth the same point value, but students will receive points for every assignment. At the end of the grading period student grades will be based on the percentage of earned points.</p> <p>90% - 100% A 80% - 89% B 70% - 79% C 60% - 69% D</p>
Support Services	<p>For Financial Aid, Accuplacer and Asset Testing, registration, and admissions information, please contact the I-AC Enrollment Office at 1-888-474-5207 or UAF Tok Center at 883-5613.</p> <p>The Writing Center is available to distance education students; to make an appointment call 1-800-478-5246. The Center offers assistance for one-on-one tutoring sessions, organizing material for essays, refining technical papers, documenting research papers, perfecting business letters, etc.</p> <p>Students can visit the off-campus library web page at http://www.uaf.edu/library/offcampus/index.html for information regarding services available. In addition, 1-800-478-5348 can be called to request materials.</p> <p>UA Online is available to all students at https://uaonline.alaska.edu/.</p>

	<p>This is a web service for grades, transcripts, etc.</p> <p>For computer or software trouble, access to University accounts or other computer related technical issues please contact:</p> <p>Jia Wu, IT Student Support Technician, Interior-Aleutians Campus University of Alaska Fairbanks (907) 474-6261 X907 jwu4@alaska.edu</p>
<p>Students with Disabilities</p>	<p>UAF has a Disability Services Office that operates in conjunction with the College of Rural and Community Development (CRCDD) campuses and UAF’s Center for Distance Education (CDE). Disability Services is a part of UAF’s Center for Health and Counseling, providing academic accommodations to enrolled students identified as being eligible for these services. Eligible persons can visit http://www.uaf.edu/chc/disability.html or contact a student affairs representative at the nearest campus, as well as Disability Services on the Fairbanks Campus at (907) 474-7043</p> <p>The Office of Disability Services implements the Americans with Disabilities Act (ADA), and ensures that UAF students have equal access to the campus and course materials. We will work with the Office of Disabilities Services (208 Whitaker Bldg., (907) 474-5655) to provide reasonable accommodation to students with disabilities.</p>
<p>Withdraw Policy</p>	<p><i>Notice to students:</i> Anyone wanting to drop a class must first withdraw officially from the course by filling out an <u>Add/Drop form</u>. The Add/Drop forms are available at the Tok University Center. A form must be completed and turned in before the drop deadline.</p> <p>If you stop attending class without officially withdrawing, you may receive an “F” grade. All grades will appear on your transcript. Transcripts are available to you through the Office of Admissions and Records in Fairbanks.</p>

Syllabus

University of Alaska
Fairbanks, Alaska

Course:

Alaska Veterinary Technology

Course Description:

Veterinary Technology is a portal to one of the most rewarding and enriching fields of study. Veterinary medicine is composed of compassionate professionals, technically skilled and work as a team. As in human medicine, the veterinary health-care team is composed of many members, each with an important role in the in the proper care of patients and function of a veterinary hospital. This course is divided into 36 weekly units encompassing science, medical terminology, animal behavior and handling office procedures, and so much more. This course is an overview of what knowledge is needed to become a veterinary assistant.

Course Delivery:

Online, asynchronous, 60% academics, 40% lab. Feedback to students and site teachers weekly. All work graded by instructor and updated weekly to site teacher. Labs and dog yard participation are led by onsite teacher.

Course Policies:

1. Students **MUST** have access to a personal computer with access to the Internet. We will use Wikispaces on Google Drive for much of our work and students are expected to use Google Docs, Slides, Forms, and Drawings. During this orientation week, we will practice all these skills. All student work will be stored in their individual file folders daily. Assignments must be **titled (e.g. Week 1)** at all times.
2. All assignments will be visible to students from the Wikispaces view folder. If you miss an assignment you can always go back and see what you missed. You are expected to complete **all** assignments unless we have communicated beforehand.
3. Meet all deadlines.

4. Don't wait until the last minute to do your work. We will be busy every day so it is your responsibility to stay caught up.
5. Please do your own work.
6. If you need help, email me immediately. I can "Google Hangout" with you on an individual basis.
7. All comments made on discussion boards or blogs must be school appropriate. We will cover Internet etiquette during this orientation week. This is not an ELA class but good grammar, capitalization, and punctuation are expected all year. Good communication is part of a teamwork environment.
8. Each assignment will be shared with you every day. You will always have access to that assignment.
9. Do not fall behind. With all the help available to you, there is no excuse not to be successful in this course.
10. Feedback is especially important in this type of course so you will get a two feedback cards each week that reflects the information I want you to know at the first of the week and at the end of the week with your Week's score based on your answers. You will always know where you stand in this course because your grades will be updated weekly.

Read the district absentee policy. Follow that for your late work if you are absent. If you know you are going to be late on an assignment and you have let me know in advance, we can work something out. Turning in assignments on time is a major component of an online class.

Animal Care Technologies

Ethics Statement:

Any form of dishonesty, such as cheating, copying, or plagiarism will result in no credit for the class. The faculty reserves the right to take additional action. No materials may be turned in for this course that has been previously submitted for another course.

Disability Statement:

University of Alaska desires to provide all students with optimum learning experiences. If you have a disability that impacts learning in this course, you must contact the Director of Special Academic Services in or to receive special assistance.

Attendance Requirement:

You are expected to complete assignments on a weekly basis.

Course Objectives:

Through distance learning students will:

- Understand basic operations of a veterinary hospital
- Learn effective communication with coworkers and clients.
- Recognize the supporting role of veterinary assistant to veterinarians and other staff members
- Obtain accurate medical history on patients
- Have working knowledge of ethical and legal issues as they relate to the veterinary profession

- Understand basic root words, prefixes and suffixes of common terms - learn relation of terms to anatomical regions
- Recognize terms in record keeping
- Gain basic understanding of positional terminology for radiology

- Have a basic understanding of the skeletal, digestive, and urinary system of both cats and dogs
- Have knowledge of the external physical condition of patients, as it pertains to weight, hydration, skin/coat condition
- Understand the basic preliminary or recheck examination
- Understand the common diseases that impact the normal physical exam

- Understand and recognize common dog and cat body language
- Learn basic low stress techniques for approaching and handling both the dog and cat in varied veterinary settings.
- Use knowledge of techniques to reduce anxiety in both the dog and the cat for common treatments and procedures

- Have a basic understanding of the normal nutritional needs of cats and dogs
- Know how to take a nutritional history and be able to assign a Body Condition Score

- Know how veterinary pharmacies are set up and be familiar with some commonly prescribed medications
 - Understand who can handle controlled medications and how they are stored
 - Be familiar with core vaccines for dogs and cats, common flea and tick preventatives.
 - Understand what steps need to be taken to prevent disease transmission
-
- Understand the administration of SQ and IM injections and medications, as well as SQ fluids
 - Understand IV catheter preparation and placement
 - Administer proper technique in performing nail trims, and ear expression, cleaning ears, and applying bandages for hemostasis
 - Administer venipuncture for heartworm test, blood glucose and PCV samples
 - Obtain, prepare and read fecal samples, urine and ear cytologies
 - Perform and interpret in house tests such as Fel/FIV, Heartworm, PCV/TP, and Urinalysis strip tests
 - Have a working knowledge of in-house lab machines and troubleshooting
 - Understand microscope care and use
 - Handle and storage of laboratory samples
 - Understand and use tools for blood pressure, temperature and weight
-
- Have basic knowledge of how x-rays work
 - Understand radiology safety, documentation and tools for the veterinary staff member and patient.
 - Know proper patient measuring and positioning for common radiologic views
 - Develop x-rays manually or digitally
 - Discuss dental x-ray
 - Troubleshoot common errors in positioning/technique
-
- Know the use for particular pieces of veterinary equipment such as IV pumps, anesthesia machines, exhaust systems, and autoclaves
 - Understand the care and maintenance as well as common troubleshooting issues with all equipment listed above
 - Clean, care of surgical and dental instruments
 - Pack surgical instruments, and other miscellaneous items used in surgery or outpatient treatments that require sterilization
-
- Prepare the surgical suite for common surgical procedures
 - Position and aseptic preparation of the patient
 - Maintain and monitor of anesthesia
 - Prevent hypothermia
 - Assist technician or doctor in dental procedures
 - Help patient recovery and postoperative care

Student Outcomes:

Course Outcomes

Through distant learning students will be able to:

1. Communicate in a professional manner in all formats- written, non-verbal, and electronic.
2. Participate in facility management utilizing traditional and electronic media and appropriate veterinary medical terminology and abbreviations.
3. Follow and uphold applicable laws and the veterinary technology profession's ethical codes to provide high quality care to patients.
4. Safely and effectively administer prescribed drugs to patients
5. Accurately dispense and explain prescribed drugs to clients.
6. Demonstrate and perform patient assessment techniques in a variety of animal species.
7. Understand and demonstrate husbandry, nutrition, therapeutic and dentistry techniques appropriate to various animal species.
8. Safely and effectively manage patients in all phases of anesthetic procedures.
9. Safely and effectively select, utilize and maintain anesthetic delivery and monitoring instruments and equipment.
10. Understand and integrate all aspects of patient management for common surgical procedures in a variety of animal species.
11. Understand and provide the proper instruments, supplies, and environment to maintain asepsis during surgical procedures.
12. Properly package, handle and store specimens for laboratory analysis.
13. Safely and effectively produce diagnostic radiographic and non-radiographic images.
14. Safely and effectively handle common laboratory animals used in animal research.
15. Understand the approach to providing safe and effective care for dogs, cats, birds, reptiles, amphibians, rabbits and ferrets, and other species

Grading Scale:

Students will be assessed using both written and performance assessments

Point Range for Grade Based on Percentages of Each Weekly Assignment

90 - 100 = A

80 - 89 = B

70 - 79 = C

60 - 69 = D

Grades lower than 60 points will be recorded as an F.

Evaluation:

Each week lesson has a point value depending on the content. Students will be given that point value prior to each lesson in the form of a Feedback template. Points earned will be converted as a percentage.

Support Services: Help for questions is only an email away. I usually respond to those inquiries within an hour or two. Instructor will also communicate regularly with the other part of the instructional team, the onsite teacher.

Schedule

Week 1 - Introduction

Week 2 - The Veterinary Profession

Week 3 - Animal Ethics

Week 4 - Medical Terminology

Week 5 - Anatomy

Weeks 6, 7, 8 - Animal Behavior, Handling, and Restraint
