The new Science/Technology/Engineering/Mathematics (STEM) MBA concentration is designed for students with an undergraduate STEM baccalaureate degree. This concentration will allow students to take three (3) approved graduate-level courses from their field of study, and pair them with School of Management classes, to provide them the skills needed to be successful in management roles within their given career field.

Possible STEM fields include Fisheries, Ocean Science, Engineering, Mathematics, Statistics, Biology, and more.

www.uaf.edu/som/
Benefits

- The School of Management classes can all be completed online, providing flexibility for students
- Rolling admissions schedule
- A business background is not a requirement. You can take seven online, self-study, pre-MBA modules in place of prerequisite courses.

Curriculum Overview

- Students are required to have an undergraduate STEM degree.
- **The STEM MBA will consist of the following courses:**
  - Five core MBA courses
    - MBA 617: Organizational Theory for Managers
    - MBA 643: Marketing Management
    - MBA 675: Quantitative Methods for Managers
    - MBA 680: Financial Markets and Strategy
    - MBA 690: Corporate Strategy
  - Three 600-level graduate courses in their approved STEM field. These courses must be approved by both a faculty member in their chosen STEM program and the MBA Advisor.
  - Two approved SOM electives at the F400 or F600 level.
